## **DETAILED ACTION**

## Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

References by Krishnan (U.S. Patent No. 6,771,262), Vining (U.S. Patent No. 6,694,163), Hsu (U.S. Patent No. 6,559,843), Oikawa et al. (U.S. Patent No. 5,963,211), and Lichtenbelt et al. (U.S. Patent No. 6,144,383) are made of record as describing related methods of volume rendering and segmentation. References by Seiler et al. (U.S. PGPUB 20020190984) and Gatti et al. (U.S. Patent No. 6,995,763) are made of record as describing related methods for discarding or removing blocks of voxels. However, none of the cited prior art references teach or suggest a method of segmenting a 3-dimensional texture map of volume data into three stacks of 3-dimensional-textured slices, nor rescaling the slices so that each slice edge dimension is of an integer power of two.
